## NIR TEST PACKAGES

- NIR Analysis \$73.70 3 working days
- NIR Analysis \$110.55 (50% surcharge) 1 working day (URGENT)

All NIR packages include: dry matter, moisture, crude protein, acid detergent fibre, neutral detergent fibre, dry matter digestibility, dry organic matter digestibility, metabolisable energy (ruminant), fat & ash.

Horse DE, Rabbit DE, TDN, RFV & nitrogen % can be applied to any NIR package at no extra charge.

**NIR Fodder Package** includes: Fresh pasture, grass, legume or pasture hay and silages. WSC can be added to this analysis, if requested.

**NIR Cereal WSC Package** includes: all cereal hay types. WSC are included in this package.

**NIR Maize Silage Package** includes: maize silage & fresh cut maize. Starch & sugar results are also included.

**NIR Pellet Package** includes: pellets, feed mixes, lentils, lupins, beans, peas, maize, sorghum, chickpeas & vetch.

**NIR Cereal Grain Package** includes: wheat, barley, triticale & oats. Starch & sugar results are also included. Pure cereal grain mixes (e.g. 50% wheat, 50% barley) can also be measured in this package.

**NIR Dairyland Package** includes: hay, pasture and silage.

- Dairyland \$73.70 3 working days
- Dairyland + NIR \$110.00 3 working days
- Dairyland (from existing NIR) \$40.70 3 working days

**AUNIR Ausscan Package** available for wheat, barley, triticale, sorghum, soya bean meal & canola

- Ausscan \$101.20 3 working days
- Ausscan + NIR \$114.40 3 working days

### **NIR Transition Package**

For dairy fodder to assess NIR plus 7 minerals - Ca, Mg, P, Na, K, S & Cl. DCAD included. Any standard NIR package above can use this package.

- \$200.20 5 working days (interim for NIR - 3 working day)
- \$300.30 (50% urgent surcharge) 3 working days (interim for NIR - 1 working day)

## **Non-NIR Packages (Ruminants) - Wet Chemistry Analysis**

These packages apply to all feed samples for which NIR calibrations are not available. Generally unusual mixed feed rations, DDG, by-products, almond hulls, cotton seed, soya bean, brewer's grain, molasses, canola seed & meal etc.

For samples with an estimated fat <2%, we recommend Option 1 or 3.

For samples, with an estimated fat >2%, we recommend Option 2, 4 or 5.

*All prices are inclusive of GST*

*All prices are valid and effective as of 1<sup>st</sup> July 2026*

*Prices are reviewed annually however Agrifood Technology & FeedTest reserve the right to modify prices at any time*

1. **Non-NIR Feed Package** includes: dry matter, moisture, crude protein, dry matter digestibility, dry organic matter digestibility, metabolisable energy (ruminants) & ash.

• \$166.10

10 working days

## **Non-NIR Packages (Ruminants) - Continued**

2. **Non-NIR + Fat Package**: as per option 1 plus fat

• \$222.20

10 working days

3. **Non-NIR + AN Package**: as per option 1 plus acid detergent & neutral detergent fibre

• \$231.00

10 working days

4. **Non-NIR + ANF Package**: as per option 3, plus fat

• \$280.50

10 working days

5. **Non-NIR + ANFSS Package**: as per option 4, plus starch & sugar

• \$385.00

10 working days

## **Other Feed Energy Packages**

**Pig Digestible Energy (DE)** includes: dry matter, moisture, crude protein, fat, ash, crude fibre, nitrogen free extractives & pig digestibility

• \$236.50

7 working days

**Poultry Metabolisable Energy (ME)** includes: dry matter, moisture, crude protein, fat, starch, sugar & poultry energy

• \$258.50

7 working days

### **AusMeat Metabolisable Energy (ME)**

The AusMeat accreditation is for supply into the EU. Feed lot rations must meet minimum levels of ME when tested with a particular method. It includes: dry matter, moisture, crude protein, fat, ash, nitrogen free extractives & metabolisable energy

• \$236.50

7 working days

### **Atwater Metabolisable Energy (ME)**

The Atwater formula is used to predict ME for monogastric animals including dogs & cats. It includes: dry matter, moisture, crude protein, fat, ash, crude fibre, nitrogen free extractives & Atwater metabolisable energy

• \$255.20

7 working days

Phone: 1300 655 474

Price List: 2026/27

*All prices are inclusive of GST*

*All prices are valid and effective as of 1<sup>st</sup> July 2026*

*Prices are reviewed annually however Agrifood Technology & FeedTest reserve the right to modify prices at any time*

### **MAFF Metabolisable Energy (ME)**

MAFF formula was developed by the Ministry of Fisheries and Forestry in England to predict ME for ruminant animals. It includes: dry matter, moisture, crude protein, fat, ash and crude fibre, nitrogen free extractives & MAFF energy

• \$255.20

7 working days

### **Energy for Ruminant, Pig & Poultry**

This package was designed to incorporate the most common farm animals. It includes: dry matter, moisture, crude protein, fat, ash, crude fibre, digestibility, acid detergent fibre, neutral detergent fibre, starch, sugar, nitrogen free extractives, ruminant ME, pig DE & poultry ME

• \$462.00

10 working days

## **Mineral Testing (ICP)**

**Transition Minerals** include: Calcium, Chloride, Magnesium, Phosphorus, Potassium, Sodium, Sulphur & DCAD

• \$126.50

5 working days

**Group 1 Minerals** include: Aluminium, Boron, Calcium, Chloride, Copper, Iron, Magnesium, Manganese, Phosphorus, Potassium, Sodium, Sulphur, Zinc & DCAD

• \$165.00

5 working days

**Group 2 Minerals** include: Group 1 minerals, plus Cobalt, Molybdenum & Selenium

• \$188.10

5 working days

**Heavy Metals/Minerals** include: Arsenic, Cadmium, Lead & Mercury

• \$103.40

5 working days

### **Individual Minerals:**

• \$52.80 (for the first mineral)

5 working days

• \$16.50 (for every other mineral thereafter)

5 working days

***For URGENT turnaround times on all Non-NIR & Wet Chemistry Packages, contact FeedTest. If possible, testing will incur a 50% surcharge.***
