Agrifood TECHNOLOGY

NEW IN-HOUSE TEST

BEVERAGE TESTING

Three analytes. One test.

Benzoic acid, sorbic acid and caffeine measured together in a single analysis, for alcoholic and non-alcoholic beverages.

Benzoic acid

Preservative widely used in soft drinks and juices

Sorbic acid

Preservative used in beverages, cordials and wines

Caffeine

Energy drinks, colas, teas and coffee beverages

LIMIT OF REPORTING

10 mg/L

(1 mg/100 mL)

TURNAROUND TIME

5 days

Urgent service: 3 working days

Why test with us

- Cost-effective: all three analytes in one test, rather than separate analyses
- Tested in-house at our Werribee laboratory, with no outsourcing delays
- Suitable for alcoholic and non-alcoholic beverages
