AWTA

AWTA (Australian Wool Testing Authority Ltd) is the largest wool testing organisation in the world. The AWTA group is comprised of three operating divisions in Australia (AWTA Raw Wool, AWTA Product Testing and Agrifood Technology), its wholly owned subsidiary NZWTA and its joint venture, JinAo Testing Company. AWTA continues to expand its service offering into other agricultural and manufacturing markets where independent, high quality and high integrity testing is a vital part of the value chain.

AWTA has expertise in:

- Laboratory testing
- Instrumentation design & manufacture
- Research & development
- Integrated sampling services

AWTA Raw Wool

Raw Wool is the largest division within AWTA and provides independent and objective wool certification services. AWTA Raw Wool's major services are sampling, testing and certifying the yield, fibre diameter, vegetable matter content, staple length and staple strength of greasy wool before it is sold.

AWTA Product Testing

AWTA Product Testing provides testing services to a broad range of industries within Australasia and international markets including fibres, textiles, plastics, automotive, building products, glass, carpets, retail products, insulation, clothing, accelerated weathering and laminates.

JinAo

AWTA and the Jiangsu Inspection Corporation operate a product testing laboratory called JinAo Testing Company based in China. The laboratory provides reliable and independent testing of Chinese products and imported raw materials/components, before shipment or as inline quality assurance testing.

NZWTA

NZWTA is the major wool testing company for the sampling, testing and certification of New Zealand apparel and interior textile wools. New Zealand's only comprehensive textile testing business is also operated within NZWTA's Napier laboratory.

The textile operation provides the company with the unique ability to offer testing services covering the entire textile spectrum from raw material to finished product.

Agrifood Technology

Since 1989, Agrifood Technology has been a provider of physical and chemical testing, servicing the Australian grain, food and feed industries. Agrifood Technology provides independent and comprehensive analytical testing services to the agricultural industry in various fields and services covering grain, fodder, fruit and vegetables, meat, soil, water, fertiliser, plant tissue, processed food, stockfeed and flour milling markets.

Our major focus is the provision of a high level of customer service, using innovative techniques and state-of-the-art equipment to meet client needs and respond quickly to testing requirements. As an added insurance, our laboratory is NATA (National Association of Testing Authorities) accredited to the ISO 17025:2005 standard and our quality system is certified to the AZ/NZS ISO 9001:2008 standard.

FeedTest is operated by Agrifood Technology and is a pioneer in the use of Near Infrared Spectroscopy (NIR) for feed testing in Australia. FeedTest provides accurate and fast feed analysis that will determine the feed and nutritional value of your stock feed products.

Core Services

Agrifood Technology test results provide valuable information for use in all areas of agribusiness and assist commercial businesses to meet consumer expectations for the assurance of the quality and safety of food, feed and other agricultural products. When you choose to use an Agrifood Technology laboratory you can be assured that your sample will receive fast and accurate analysis. Our laboratories are located in Werribee, Victoria and Bibra Lake, Western Australia.

- Grain quality assessment
- Pesticide residues
- Mycotoxins
- Allergens
- Nutritional analysis
- Water, soil & fertiliser analysis
- Stockfeed analysis
- Plant tissue
