## ANALYTICAL TESTING SERVICES

## *Your link with quality grain testing*

Agrifood Technology provides independent and comprehensive analytical testing services to the grain, flour milling, food, fruit and vegetables, stockfeed, water, soil and fodder industries. Our major focus is the provision of a high level of customer service, using innovative techniques and state-of-the-art equipment to meet client needs.

Our test results provide valuable information for use in all areas of agribusiness assisting commercial businesses to meet consumer expectations for the assurance of the quality and safety of food and other agricultural products.

As added insurance, our laboratory is registered with the National Association of Testing Authorities (NATA) to the ISO 17025:2005 standard and our quality system is certified to the AZ/NZS ISO 9001:2008 standard.

Agrifood Technology has two laboratories, one in Werribee, Victoria and the other in Bibra Lake, Western Australia.

INDEPENDENT  
ACCURATE  
INNOVATIVE SOLUTIONS

### GRAIN & FLOUR QUALITY

Agrifood Technology has over 20 years of Grain and Flour Testing knowledge and experience. The high milling quality of Australian wheat assures its value on the world market. Being able to provide customers with information as to the suitability of this wheat to particular processing techniques and end products is of immense value.

Test Capabilities:

- Grain Assessment
- Wheat Quality
- Flour Quality
- Noodle Quality
- Baking Quality
- Farinograph
- Extensograph
- Alveograph (W Value)
- Amylograph
- Wet Gluten
- Feed & Fodder Quality

### FOOD SAFETY

Agrifood Technology has a rich and diverse history of providing specialised food safety testing services to the Agricultural industry.

Test Capabilities:

- Chemical Residues
- Heavy Metals
- Mycotoxins
